

17 April 1961

Brig. Gen. H. A. Boushey, USAF
Commanding Officer
Arnold Engineering Development Center
Arnold Air Force Station, Tennessee

Dear General Boushey:

I wish to express to you my sincere appreciation for welcoming members of my staff to your center and arranging for a most interesting and instructive tour of the testing facilities. The men have reported that their limited time was most profitably utilized in viewing the external configurations of the facilities and that the many lucid explanations were most helpful in preparing our men for our particular missions.

Especial thanks should be given to Lt. Col. Miller who most graciously spent the day guiding the men through the Center.

Thank you again for your most generous cooperation.

Sincerely,

Arthur C. Lundahl
Director
